## CONTENTS

### CONDITIONED FOR SUMMER

The first cheerful sign of Spring — forerunner of the hot summer days ahead — is the signal for the modern housewife to rid her home of the heavy, tired winter things and seek the refreshing charm of summer furnishings.

Waite rugs play a major part in satisfying this urge for change. They are truly "conditioned for summer" — cool, colorful, and refreshing — because they are made of the ideal materials for summer use — Sisal and Fibre.

### GREATER INTRINSIC VALUE

Waite rugs for 1941 have a greater intrinsic value than ever before, for they now feature the new exclusive, cleanable, mildew-proof, and water-resistant fibre which preserves the natural ruggedness of the weave. In addition, the new Waite line shows a more generous use of the finest type of Java Sisal, which assures unexcelled pattern permanency, thus greatly prolonging the attractive life of the rug.

### VERSATILE MERCHANDISING

Every rug in the 1941 line is perfectly reversible. This opens the way to aggressive and versatile merchandising, because it appeals to the widest of buying motives. Double life and value — two patterns at no extra cost — will please any budget and gain for you many satisfied customers. Consider this appeal for special sizes as well as for standard rugs and the result is increased volume and profits.

### COMPLETENESS

Waite rugs for 1941 are complete in the variety of styles — complete in the choice of qualities — complete in the assortment of colors. This completeness assures the buyer of a balanced line — with each of the seven qualities the result of a careful analysis of current style trends.

### DEALER SELLING AIDS

A coordinated display card — in full color — has been prepared for each of the seven Waite qualities for 1941. These will be furnished you without charge. When ordering your Waite Rugs, indicate what displays you can use.

# Sisalwaite

The exclusive new Waite cleanable, moisture-resistant fibre, combined with lustrous color-fast Java Sisal, gives Sisalwaite unexcelled pattern permanency, durability, and perfect reversibility. Because of its unusual styling, perfect pattern balance can be had in any size, either special or regular . . . and in any width . . . from 12 feet to 27 inches. Intriguing design plus new, highly desirable utility features make Sisalwaite an outstanding value for 1941.

# Sisaltex

The perfectly reversible feature of all Waite summer rugs is made doubly important for 1941 by the use of the new, exclusive fibre that is cleanable and water resistant. Sisaltex features this sturdy, added-value fibre background, high-lighted with a livable modern pattern created by the use of gaily colored sisal from Java. These two ideal summer rug materials give Sisaltex exceptional style appeal and great intrinsic value.

# Heathercraft

Heathercraft is a modestly priced rug, designed for interior use throughout the year. The attractively simple styling, the tastefully blended colors, and the natural ruggedness of its weave, all contribute to its popularity. Heathercraft is ideal for runners and special sizes, because the reversible pattern is complete regardless of the sizes required. Then, too, the 12-foot broadloom width offers the means of solving those perplexing, large size, rug requirements.

# Waifair

The new Waifair for 1941 features a large choice of colors . . . seven new backgrounds . . . more texture . . . through the use of more intermittently dyed sisal, and greater intrinsic value . . . since the durable fibre background is woven from the new exclusive mildew-proof and water-repellent fibre. Like all Waite rugs, it is perfectly reversible. In addition to regular sizes, many stores also carry it in rolls to serve customers who need special sizes and runners.

In rolls of 50 lineal yards.

Woven with Java Sisal warp and the new exclusive Waite moisture-resistant fibre, Sisalcraft has the luxurious qualities of an all-sisal rug, and is available at a saving in cost. It is the result of several years' effort to create a popular-priced rug of outstanding merit, by combining the best features of the two ideal summer rug materials — sisal and fibre. The sisal warps glisten in clear color-fast shades and the tightly twisted fibre adds resiliency and permanent flat-lying sturdiness to the rug.

# Sisalcrest

Sisalcrest is an all-sisal rug woven from the finest stock dyed Java Sisal. The clear, sparkling colors satisfy the most exacting color-fast requirements, and, of course, since it is an all-sisal rug, it serves as well outdoors as indoors. The subtle pattern is woven through and through the rug, thus insuring pattern permanency and perfect reversibility. Sisalcrest is ideal for special sizes and large size rugs, for its generous weight keeps it on the floor and the pattern is in perfect balance regardless of size.
